on or before the date & time of submission of bids specified in this tender document, in a Sealed Envelope. The envelope shall bear (Name of the Work), the tender number and the words 'DO NOT OPEN BEFORE' (due date & time) as mentioned in the Clause D of Section II.

Note: The Bidder has to upload the Scanned copy of all above said original documents as Bid-Annexure during Online Bid-Submission.

7. Special Note on Security of Bids

Security related functionality has been rigorously implemented in ETS in a multidimensional manner. Starting with 'Acceptance of Registration by the Service Provider', provision for security has been made at various stages in Electronic Tender's software. Specifically for Bid Submission, some security related aspects are outlined below:

As part of the Electronic Encrypter™ functionality, the contents of both the 'Electronic Forms' and the 'Main-Bid' are securely encrypted using a Pass-Phrase created by the Bidder himself. Unlike a 'password', a Pass-Phrase can be a multiword sentence with spaces between words (eg I love this World). A Pass-Phrase is easier to remember, and more difficult to break. It is recommended that a separate Pass-Phrase be created for each Bid-Part. This method of bid-encryption have the security and data-integrity related vulnerabilities which may be inherent in systems which use Public-Key of the specified officer of a Buyer organization for bid-encryption. Bid-encryption in ETS is such that the Bids cannot be decrypted before the Public Online Tender Opening Event (TOE), even if there is connivance between the concerned tender-opening officers of the Buyer organization and the personnel of e-tendering service provider.

Typically, 'Pass-Phrase' of the Bid-Part to be opened during a particular Public Online Tender Opening Event (TOE) is furnished online by each bidder during the TOE itself, when demanded by the concerned Tender Opening Officer and he/she may authorize the bidder to open his/her bid himself.

There is an additional protection with SSL Encryption during transit from the client end computer of a Supplier organization to the e-tendering server/ portal.

8. Public Online Tender Opening Event (TOE)

ETS offers a unique facility for 'Public Online Tender Opening Event (TOE)'. Tender Opening Officers as well as authorized representatives of bidders can attend the Public Online Tender Opening Event (TOE) from the comfort of their offices. For this purpose, representatives of bidders (i.e. Supplier organization) duly authorized are requested to carry a Laptop and wireless internet connectivity.

Every legal requirement for a transparent and secure 'Public Online Tender Opening Event (TOE)' has been implemented on ETS. As soon as a Bid is decrypted with the corresponding 'Pass-Phrase' as submitted online by the bidder himself (during the TOE itself), salient points of the Bids are simultaneously made available for downloading by all participating bidders. The work of taking notes during a manual 'Tender

Opening Event’ is therefore replaced with this superior and convenient form of ‘Public Online Tender Opening Event (TOE)’.

ETS has a unique facility of ‘Online Comparison Chart’ which is dynamically updated as each online bid is opened. The format of the chart is based on inputs provided by the Buyer for each Tender. The information in the Comparison Chart is based on the data submitted by the Bidders. A detailed Technical and/ or Financial Comparison Chart enhance Transparency. Detailed instructions are given on relevant screens.

ETS has a unique facility of a detailed report titled ‘Minutes of Online Tender Opening Event (TOE)’ covering all important activities of ‘Online Tender Opening Event (TOE)’. This is available to all participating bidders for ‘Viewing/ Downloading’.

There are many more facilities and features on ETS. For a particular tender, the screens viewed by a Supplier will depend upon the options selected by the concerned Buyer.

9. Important Note:

In case of internet related problem at a bidder’s end, especially during ‘critical events’ such as a short period before bid-submission deadline, during e-auction, it is the bidder’s responsibility to have backup internet connections. In case there is a problem at the e-Procurement/e-Auction service provider’s end(in the server, leased line etc) due to which all the bidders face a problem during critical events, and this is brought to the notice of BSNL by the bidders in time, then BSNL will promptly re-schedule the affected event(s).

10. Other Instructions

For further instructions, the vendor should visit the home-page of the portal (<https://www.tenderwizard.com/BSNL>), and go to the User-Guidance Center. The help information provided through ‘ETS User-Guidance Center’ is available in three categories – Users intending to Register / First-Time Users, Logged-in users of Buyer organizations, and Logged-in users of Supplier organizations. Various links are provided under each of the three categories.

Important Note: It is strongly recommended that all authorized users of Supplier organizations should thoroughly peruse the information provided under the relevant links, and take appropriate action. This will prevent hiccups, and minimize teething problems during the use of ETS.

The following ‘FOUR KEY INSTRUCTIONS for BIDDERS’ must be assiduously adhered to:

1. Obtain individual Digital Signing Certificate (DSC or DC) well in advance of your first tender submission deadline on ETS
2. Register your organization on ETS well in advance of your first tender submission deadline on ETS.
3. Get your organization’s concerned executives trained on ETS well in advance of your first tender submission deadline on ETS.
4. Submit your bids well in advance of tender submission deadline on ETS (At least one day before the deadline) (There could be last minute problems due to internet timeout, breakdown, etc).

While the first three instructions mentioned above are especially relevant to first-time users of ETS, the fourth instruction is relevant at all times.

ANNEXURE-E

VARIOUS METHODS OF INTERNAL FITTING AT CUSTOMER PREMISES

Type I:

In Multi Storeyed buildings, some space may be provided in the ground floor for fixing Two C.T. Boxes.

One C.T. Box for terminating the Input U/G Cable and the Second CT Box is for terminating the Output cables to different floors and wings in the building.

At the output side, individual small size cables (5 pair, 10 pair and 20 pair of U/G or Switch Board Cable) may be terminated and taken to different floors and wings as per the requirement and terminated to a DP.

The Multiple Output Cables must be bunched and taken through a single PVC pipe and must be branched at a suitable points with tapering arrangement for PVC pipes size.

This will result in reduction of cost for multiple PVC pipes.

Type II:

For buildings having more than three floors, on the output side, instead of taking many number of small size cables, one single higher size U/G Cable (50 or 100 pairs as per requirement) can be taken and branched at different floors by using Cut Pair Method and terminated to DPs at different floors.

In this case, the Output U/G cable from C.T.Box need not be taken through PVC and U/G cable can be simply clamped along the wall neatly.

Type III:

Wherever Concealed wiring is already done by the subscriber, the input CT Box of our U/G Cable must be located nearest to this concealed wiring terminated point.

All the concealed wirings from different floors must be terminated in a separate CT Box and these two CT Boxes must be jumpered.

Wherever the subscriber's own wiring is in progress, the External SDEs must insist on provision of 4 pair Switch Board cable from each flat to a common point.

If the number of floors is less than three, individual cables can be brought to ground floor and terminated to a common point.

Tender No: DGM (NWO-NE& KAL)/UG CF/MDF to PILLAR/2021-22/1 dt 19/03/2022

SIGNATURE OF BIDDER

For buildings having more than three floors, the switch Board Cable from each floor must be brought into a common point in the same floor and terminated in a CT Box floor-wise and provision may be made from ground floor for linking these floor-wise common points.

U/G Cable can be brought into ground floor or to each floor as per the requirement.

General:

In all the Multi Storeyed buildings, DP is to be linked in such a way that the sub lead requirement from DP - to Rosette is less than 10 metres.

The first fitting from DP to Sub premises can be taken up only for preferential subscribers (High Calling /Corporate subscribers).

The PVC fitting can be taken up only upto the door point and inside the house simple clipping of service lead may be taken up .

For other subscribers, simple clipping of service lead can be taken up right from the DP point itself without going in for PVC pipe.

Individual House building:

Internal DP can be taken up for individual Bungalow type houses and from DP to Rosette, Service Lead can be taken up by simple clipping along the wall and windows etc.

Wherever interior lanes are there, instead of laying the cable under the ground, the possibility of taking the U/G cable to the subscribers' premises by simple clipping the cable along the wall at a height of 9 ft. level is suggested.

The DP must be provided in a location, so that the length of the service lead is only less than Ten metres

For all DP erection work, there is no need for going in for GI Pipes, which is very much costly.

Instead the heavy duty blue water PVC pipe of 1" Dia and length of 2 metres may be used for all internal DP's.

For taking the cables along the wall, the PVC pipe of wall thickness of 1.5 mm, of various sizes (1/2 inch, 3/4 inch, 1 inch, 2 inch, 2" etc) may be used inside the building.

Tender No: DGM (NWO-NE& KAL)/UG CF/MDF to PILLAR/2021-22/1 dt 19/03/2022

SIGNATURE OF BIDDER

For fixing of PVC pipes, heavy duty GI Clamps must be used.
For clipping the service leads tinned/brass clipping must be used.

For Tail cable laying purpose, full fledged Trench of 3' depth and 1' width need not be followed.

For Tail cables, the depth of 20 cm and width of 15 cm can be maintained.

Payment for the Tail Cable Trench shall be made at the rate specified for Cutch road rate.

Sand filling, excess Earth removal .. need not be included for payment for Tail Cables.

For DP Tail branch joints, the payment must be made as per the size of DP for which the Tail cable is joined, irrespective of the size of the main cable from which this is tapped.

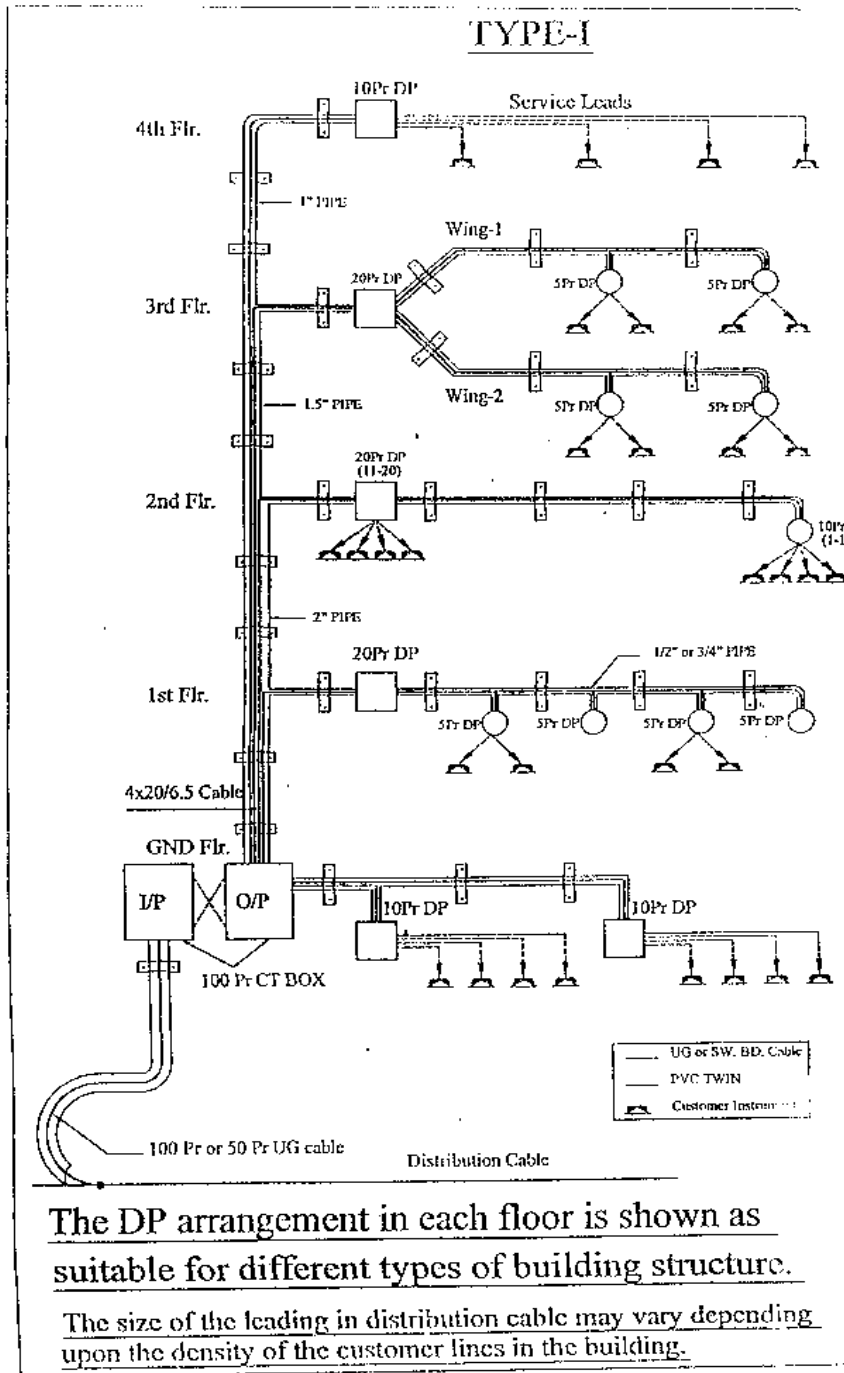

(Ex) If 10 Pair Tail is branched from 200 pair main cable, the payment for the joint should be at the rate of 10 pair cable and not for 200 pair.

In Multi Storeyed building, the charges for DP fixing should not be taken as per the full-fledged DP erection rate.

The full-fledged DP erection includes supply of PVC pipes, Fixing and Termination, whereas for fixing the DPs inside the premises, only Fixing and Termination portion alone to be charged.
